

Where the Conversion Leaks Are

wedibox.com · CRO Recommendations · August 2026

The single most valuable conversion mechanism on this site is the pricing page's ability to convert visitors into plan selections, but it is bleeding value because the page lacks a clear, plan-specific call-to-action and presents conflicting prices across the site, undermining trust and leaving visitors without a direct path to purchase.

10	Optional field ambiguity The get-started form labels one field as optional but does not clarify which fields are required, leaving...	Medium	Low	3/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
